SLISOFT ACADEMY

OBJECT ORIENTED PROGRAMMING

EPISODE - ⑦

POLYMORPHISM

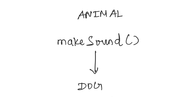

* Same Interface but different behaviour

» Dog.makeSound() → Woof
» Cat.makeSound() → Meow
» Cow.makeSound() → Moo

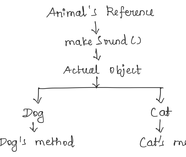

SAME OPERATION
makeSound()
+
DIFFERENT BEHAVIOUR
⇩
POLYMORPHISM

OVERRIDING

* Child provides specialized implementation
⇩
METHOD OVERRIDING

Runtime Idea:

⇒ Runtime / Dynamic Polymorphism

OVERLOADING

» print(int)
» print(string)
» print(int, int)

Same name
+
Different Parameter List
⇩
OVERLOADING

NOTE: Language support differs.

OVERLOADING vs OVERRIDING

Overloading	Overriding
Same name but different parameters	Inherited operation specialized implementation

POLYMORPHISM

One common abstraction / Interface
⇩
Different implementations
⇩
Different behaviour

Do users need to know how everything works internally ?

ABSTRACTION ...
