OBJECT ORIENTED PROGRAMMING

EPISODE - 9

INTERFACE & ABSTRACT CLASSES

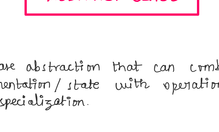

→ Define WHAT without prescribing every HOW

IMPORTANT ⇒ COMMON CONTRACT

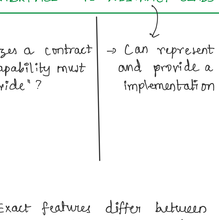

INTERFACE

* Defines a contract that implementation agree to provide.

① UPI Payment
② Card Payment
③ Wallet Payment

Why interface ?

✓ Depend on the abstraction, not on the concrete implementation

ABSTRACT CLASS

* A base abstraction that can combine shared implementation / state with operations intended for specialization.

Note: Exact features differ between Java, C++, C#, Python, etc.

RECAP:

Interface	Abstract Class	Implementation
↓	↓	↓
Contract / Capability	Shared Base abstraction	Concrete behaviour
